***Allowable Subject Matter***

Claims 1-3, 5-9, 11, 13-14, and 16-21 are allowed.

The following is an examiner's statement of reasons for allowance: prior art does not teach nor render obvious a digital amplifier for converting an audio signal to a power output that has, in combination with other limitations, wherein the ripple suppression circuit is connected to a first transistor of the at least one pair of transistors; and wherein the ripple suppression circuit is configured to drive the first transistor of the at least one pair of transistors in a linear region of the first transistor; neither does it have wherein the ripple suppression circuit is configured to drive the first transistor of the at least one pair of transistors in a linear region of the first transistor; wherein the ripple suppression circuit is configured to generate an error signal on the basis of a comparison of a voltage at the power supply port to a reference voltage and a voltage drop over a second transistor of the at least one pair of transistors and to control a gate voltage of the first transistor on the basis of the error signal to drive the first transistor in the linear region; nor does it have a reference voltage source which generates the reference voltage on the basis of a voltage at the power supply port to ensure a required compensation margin; nor does it have wherein the linearly controlled voltage controller is for multiple channels of the amplifier; wherein the least one pair of switches is configured as an H-bridge; and wherein a coarse supply voltage setting is applied in front of the linearly controlled voltage controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
